

## Billroth Kolloquium Summer semester 2017

Thursday 12:30; large Seminar room Billrothstr. 11

Date	Presenter	Title
5.10. #	Markus Kuenzler (ETH Zurich)	Peptides as defense effectors of mushrooms against bacteria and nematodes
12.10.	Andreas Traweger (PMU)	Novel Concepts to Regenerate Tendon and Bone
19.10.	Soh Wai Tuck (AG Brandstetter)	Two distinct conformations in Bet v 2 determine its proteolytic resistance to cathepsin S: Relevance to antigen presentation
26.10.		
2.11.		
9.11.	Albert Duschl	How about applying for an EU grant? Notes from a grizzled veteran
16.11.	Galler Stefan	The power act of muscle
23.11.	Timm Fiebig (Uni Hannover)	Characterization and Exploitation of capsule biosynthesis enzymes: Towards in vitro vaccine production
30.11.	Ulrich Eckhard	Bacterial flagella in the moonlight of proteolysis
7.12.	Tanja Leitner (AG Brandstetter)	CbiN domain protein from B.cereus strain Q1, a bacterial collagenase inhibitor?
14.12.	Wolfgang Skala	MoFi – A software tool for annotating glycoprotein mass spectra by integrating hybrid data from the intact protein and glycopeptide level
21.12.		
11.1.		
18.1.	John Dunlop	The role of 3D Geometry on Tissue Growth
25.1.		

# this presentation will take place at 15:30
