List of potential topics for debates A & B (more suggestions welcome, please email Christine & Lavinia)

- All data should be made available along with the manuscript
- We disapprove of p-values
- Impact factors for the ranking of journals should be abolished
- Funding for research should only come from public sources
- Non-significant results should be published just as significant ones are
- Results should be replicated at least three times before they should be published
- Authors should pay for the costs of open access
- Reviewers should receive compensation for their work
- Neuroscience is too technology-driven
- Special funds for women in science should not exist
- Female researchers with children should be allowed to bring them to the office
