

BSc/MSc thesis in Urban Ecology

We are offering a BSc/MSc project on the effect of urbanity on insect food webs. Field work will be conducted in Salzburg and will focus on aphid-parasitoid food webs on city trees. Within the project there will be room for development of your own ideas.

The candidate should have an interest in urban ecology, invertebrate identification and data analysis. Ideally the project will begin in the spring. If you are interested, please contact Jana Petermann, Department of Biosciences, University of Salzburg (jana.petermann@sbg.ac.at) or Angela Hof, Department of Geography and Geology, University of Salzburg (angela.hof@sbg.ac.at). Further information can be found here: <https://www.uni-salzburg.at/index.php?id=209099>.
