

SALZBURG CENTER FOR  
SMART MATERIALS

# SAVE THE DATE

**12. – 15. SEPTEMBER 2022**

Science City Itzling · Salzburg · Austria

■ **CONFERENCE**

2<sup>nd</sup> International Conference  
for Smart Materials

■ **WORKSHOP**

1<sup>st</sup> Workshop on Functional Nano  
Structured Sustainable Materials

12. – 14. September

14. – 15. September

## ■ CONFERENCE

2<sup>nd</sup> International Conference  
for Smart Materials  
**12. – 14. September**

The focus of this conference is to bring together an international and diverse research community with leading academic scientists and researchers with different backgrounds as well as researchers from industry to share their latest findings on smart materials. The conference emphasizes not only on the material science and engineering side, but also on tangible user interfaces and smart manufacturing.

## ■ WORKSHOP

1<sup>st</sup> Workshop on Functional  
Nano Structured Sustainable Materials  
**14. – 15. September**

We are inviting bachelor, master and PhD students, postdocs as well as scientists from research and industry to get introduced into the fascinating properties of green chemistry and sustainable functional materials, e.g. porous tannin based materials. We perform many lab-on experiments learning how to synthesize and characterize these materials.

**These will be exciting events that you should not miss!  
We are looking forward to welcome you in Salzburg.**
