

Meet our Alumni – Matteo Eichhorn

Which career steps have you taken since graduating from EUS?

After finishing my Double Degree with LUISS, I have started working in ORF's regional office in Salzburg as a reporter for radio and television. When I got accepted at the College of Europe with a scholarship, I decided to quit my job and go back to studying.

How did the EUS Master influence your professional career?

Without my courses at SCEUS, I would have never been accepted in Bruges. Especially Prof Herzig's course on EU law and Prof Blauburger's course on EU politics have been very useful at the College.

Which aspects of our interdisciplinary programme did you like most?

This master offers a great introduction to EU affairs and gives you many different career options afterwards.

What advice can you give future EUS alumni?

Try to specialise in a particular policy field after your master: There is a great demand for experts in energy, trade, data protection, defence... Find a topic that you're passionate about.
