

*Talk on Tuesday, 30. Juni 2026*

*Start: 10:15 till 11.30 Uhr*

*in HS 424*

*The talk will be presented in English*

# Cracking the kinematic code

**Prof. Dr. Cristina Becchio**

**Universitätsklinikum Hamburg Eppendorf**

The way we reach for objects, manipulate them, and hand them to others provides a rich window into our mental states. Our actions do not merely implement motor plans; they carry information about ongoing cognitive and decision processes: what we want and how much we want it, what we fear, what we expect, and what we plan to do next. In this talk, I will present a framework for determining whether and how individuals access this information to predict others' behaviour.
