Database Research Cluster Opening

Computing Infrastructure for the University of Salzburg

For Researchers From All Faculties and Disciplines

The Database Research Cluster offers a **powerful and reliable computing infrastructure for computationally intensive research**, backed by excellent technical support. It is open to all researchers at the University of Salzburg.

At the opening event, we will **introduce the computing infrastructure to the public**, present typical usage scenarios, showcase examples of applications in the Digital Humanities, and provide information on how to use the infrastructure.

For large-scale data analyses, simulations, and other computationally intensive research or teaching environments, we offer **virtual machines**. These are flexible in terms of CPU cores, RAM, and storage space. For performance experiments, we offer **bare-metal access to high-performance servers** connected via a high-speed network.

Opening Agenda

Thursday, 05 November 2026 | 14:00–16:00

Lecture Hall I – Christian Doppler | Jakob-Haringer-Straße 2A | 5020 Salzburg

14:00 Opening

Sebastian Forster (Vice Dean DAS), Robert Elsässer (Head Dept. of CS)

Presentation of the Database Research Cluster and Research Opportunities

Nikolaus Augsten, Martin Schäler, Daniel Kocher

Use Cases from the Digital Humanities

Karoline Döring, Katharina Zeppezauer-Wachauer, Peter Färberböck

15:20 Get Together and Refreshments
