Double Degree Salzburg-Rome

Students will spend their first two semesters in Salzburg and their third and fourth semester in Rome.

Programme in Salzburg

Students, who want to join and graduate within the DD-programme, have to be enrolled in EUS at Salzburg University. To be eligible for the Double Degree programme, they must apply in time and until the beginning of the second year have earned all their academic credits for their first and second semester in Salzburg and move to Olomouc for the second one, following courses there.
A group of students from each University can join the DD-Programme every year. The students do not have to pay extra fees for the Guest University.

The Deadline for applying for the DD-Programme at SCEUS will be made public by the SCEUS every year. Interested students are welcome to apply and will be informed if they are viable for a study place.

The candidates are nominated by the SCEUS to the Guest University.
As soon as study places in the Double-Degree Programme are confirmed, students are advised to apply for the Erasmus Programme (info at the International Office) – caution: Erasmus-application deadlines may differ.

Programme in Rome

Students will arrive at LUISS at the beginning of the winter semester (September), register at the University and enrol in the courses according to the requirements of LUISS as well as the EUS curriculum at the University of Salzburg. They will follow courses during two semesters in Rome. Details are given in time.
The Master Thesis will be co-supervised by joint agreement from a Salzburg and LUISS supervisor. Students have to graduate in Rome at the end of their second semester in Rome, there will be detailed information at the beginning of the programme and assistance in Rome concerning all the formalities. After successful graduation in Rome, students will hand in their thesis and documents in Salzburg and receive the MA in EUS.
Any costs concerning the study visit (travel costs, accommodation, etc.) have to be covered by the students themselves – we advise do apply for an Erasmus scholarship to help do that.
